Textile Recycling Project

Company participation in
Textile Recycling Loop
through collaboration based on empathy

Textile Recycling based on "Textile to Another"

Solving serious problem of waste clothing

"Company participation in Textile Recycling Loop "

Through collaborating with a large number of companies on the "collection" process,
"regeneration" process, and "contribution" process,

we build a one- stop "company-participation textile recycling loop" that has never existed before.

Company participation in Textile Recycling Loop

| "Collection" process		"Regeneration" process		"Contribution" process

Loop

"Collection" process

"Surplus inventory of apparel companies"
"Surplus textiles of textile trading companies"
"Textile waste generated in the production process of factories"
(waste clothing / waste textiles)
Will be collected in cooperation with many companies.

"Regeneration" process

Many companies cooperate to regenerate the collected textiles into "Textiles to Another" recycling-oriented Sustainable Materials.

"Contribution" process

Contribute by cooperating with many companies to use "Textile to Another" recycling-oriented Sustainable Materials made from waste clothing and waste textiles.
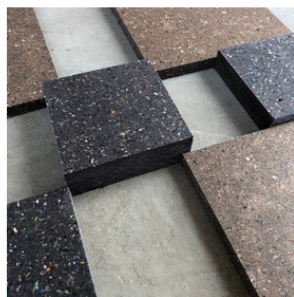

"PANECO" Board made from waste clothing

Recycling board "PANECO" made from waste clothing and waste leather,
Developed based on the idea of "Textile to Another"

Recycling board "PANECO" made from waste clothing and waste leather.
